

# PORTFOLIO ASSIGNMENT

EMILY WATSON

# DESIGN PROCESS

- Pinterest
- Figma
- Trello
- Codepen
- Googling. So much googling.
- Trial and error
- Decisions: often based on time constraints. Also, creative projects always evolve to be different from the first drafts.

# CHALLENGES

- Piecing together the previous weeks' lessons into a cohesive knowledge base to make a website
- Being over-whelmed by the creative possibilities
- When CSS failed me but I don't know JS yet
- Knowing when to stop changing things in CSS (its never perfect)
- Media queries
- Remembering to spell colour without a 'u'

# ETHICAL ISSUES

- How much I like bright colours vs how much other people like bright colours
- My website may not be great for people with colour-blindness
- With more time, I would keep adding to it to make it more accessible
- The mobile version got broken somewhere along the way

# FAVOURITE PARTS

- CSS colours
- Getting rotate to work
- Designing in Figma
- Writing the code, then seeing it come to life
- The moments when the thing worked and didn't break any other things!
- Making Hector the Vector cat. Unfortunately Hector wasn't ready in time for the website, but his day will come.

HECTOR THE  
VECTOR CAT
